WIRELESS 300N OUTDOOR POE ACCESS POINT

QUICK INSTALL GUIDE

MODEL 524711

INTELLINET
NETWORK SOLUTIONS

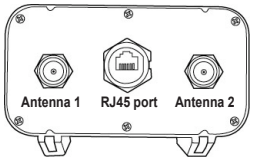
INT-524711-QIG-1209-02

Thank you for purchasing the INTELLINET NETWORK SOLUTIONS™ Wireless 300N Outdoor PoE Access Point, Model 524711.

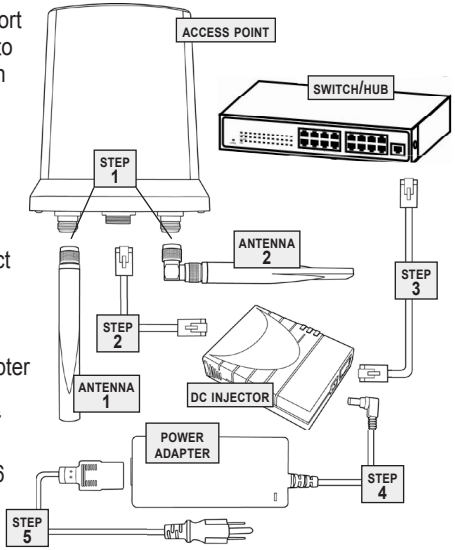
This guide presents the basic steps to set up and operate this device. For detailed instructions and specifications, refer to the user manual on the CD enclosed with this product or at **www.intellinet-network.com**.

Installation

1. Attach the antennas to the access point. ***NOTE:*** Antenna 1 is the primary antenna, used while transmitting/receiving in 11b/g/n (single antenna) mode.

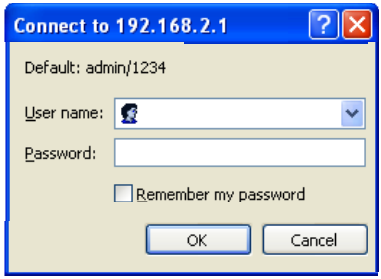


2. Using the included Ethernet cable, connect the RJ45 port of the access point to the Power/Data Out port on the DC injector.
3. Connect the LAN port on the DC injector to your network switch or hub.
4. Connect the power adapter to the DC injector.
5. Using the included power cord, connect the power adapter to an available AC outlet. ***NOTE:*** Only use the power adapter included with this access point — *not* one from any other device. (See Step 6 for an alternative configuration.)



INTELLINET NETWORK SOLUTIONS

6. As an alternative to using the included injector and power adapter, you can also use any IEEE802.3af-compliant PoE injector.
7. Start your Web browser — MS Internet Explorer, for example — and open to http://192.168.2.1 to display a login window.
8. Enter “admin” for the username and “1234” for the password.



Additional installation instructions — as well as detailed explanations for all the setup options — can be found in the user manual on the enclosed CD.

Safety Guidelines

- *Do not* yank any connected cables; disconnect them gently.
- Do not immerse this device in water.
- If placing this device at heights on a pole or a wall, make sure it’s firmly secured to prevent damage or possible injury.
- Access point parts (antennas, connectors, etc.) are dangerous should young children put them in their nose or mouth. *Keep this device out of the reach of children!*
- It’s normal for the device to become hot when used for a long time, so keep it away from paper, cloth and other flammable materials.
- There’s no user-serviceable part inside the device. If you find that it isn’t working properly, contact your dealer (place of purchase) and ask for help. *Do not* disassemble the device: Doing so will void the warranty.
- If smoke or strange odors emanate from the device or any of its components, turn the power off immediately.

INTELLINET NETWORK SOLUTIONS™ offers a complete line of active and passive networking products.
